

**SW I/O 1 to 8:** Inputs or outputs for audio signals or control voltages. The 8 “SW I/O” sockets can be connected one after the other to the “O/I” socket via a trigger signal (“Clock In” input). Via control voltage (input “CV In”) also in any order.

**Common T&H Input:** Input for the Track & Hold submodule.  
**Common Switches In/Out:** Output or input for audio signals or control voltages. Internally, a trigger signal or control voltage is connected to one of the 8 “SW I/O” sockets.
