

A-141-2 VCADSR VOLTAGE CONTROLLED ADSR/LFO

CVA: Control voltage input for the duration of the attack phase.

CVD: Control voltage input for the duration of the decay phase.

CVS: Control voltage input for the level of the sustain phase.

CVR: Control voltage input for the duration of the release phase.

Comm. CV: Control voltage input that regulates the lengths of the attack, decay and release phases together.
